

4 RAINBOW FLATDECK & HYD. TILT CAR & EQUIP. LOWBOYS (CHANNEL FRAME) (April 2011)

These good-looking Canadian-made trailers are well-built with high-grade structural steel channel frames, thicker steel than the competition. They are mass produced to keep the cost down (you save). Black is the standard color, however, other colors are available for a fee. The wiring is enclosed and protected. Standard equipment includes safety chains, a front jack, 4 wheel electric brakes, (optional on 7000 G.V.W. car & equip. lowboys) break-away equipment (including battery), 2 5/16 coupler, stake pockets, standard D.O.T. approved lighting, and radial tires.

Comes with removeable (bolt-on) fenders except tilts and split tilts and a 7-prong plug wired to Canadian Standard. There are other extras and options not listed here. These trailers are excellent pulling due to weight distribution. Most importantly, Rainbow has the best warranty in the industry.

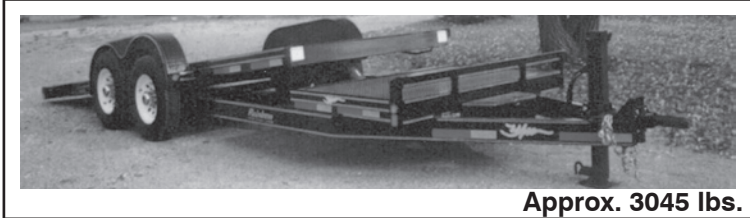

Approx. 1830 lbs.
