

6 RAINBOW SNOWMOBILE, A.T.V., & UTILITY TRAILERS (JUNE 2014)

These good-looking Canadian made trailers are well built with high grade structural steel frames. The Rainbow Trailers are zinc-coated to inhibit rust, then acid washed, primed, then painted with a high quality paint. The wiring is closed in. Standard equipment includes safety chains and a front jack. Break-away equipment including battery is included on trailers with brakes. Standard D.O.T. approved lighting (7 prong plug). These trailers are excellent pulling due to weight distribution. Most importantly, Rainbow probably has the best warranty in the industry (5 year structural warranty).

Approx. 980 lbs.

Approx. 2058 lbs.

XPRESS (E-SERIES) 2 PLACE SNOWMOBILE, A.T.V

XPRESS (E-SERIES)

HEAVY DUTY 4 PLACE SNOWMOBILE/UTILITY

Express trailers come with 1-part epoxy primer and enamel paint.

7000 G.V.W. (2 5/16" coupler), 4 wheel electric brakes, built stronger with 5" channel main frame, 2 x 3500 lb. axles; 205/15" (6 ply) radials; four tie down bars; 7 prong plug, bull-dog flipjack, rear load; front unload; load up to five or six ATV's sideways. Comes with 54" x 80" slide-in ramp.

These bigger axles and tires will help eliminate bearing problems on long trips, and you can use the trailer for other jobs like hauling limited amounts of lumber, hay, garden sheds and hundreds of other items that are heavier than snowmobiles.

24' E = 24' 10" long at center, 22' 4" at sides x 8' 2" wide..... **\$5299**

OPTIONS: Spare rim **\$70**
 Spare rim & radial tire **\$170**

8' x 14' weighs approx. 1660 lbs.
